SUMMARY

As a Front-End Developer with 2 years of experience, I'm passionate about creating intuitive and engaging web experiences. I excel in transforming design concepts into seamless user interfaces and am eager to learn and adapt to new technologies. My strong communication and teamwork skills, combined with a dedication to continuous growth, drive me to deliver high-quality results in every project.

EXPERIENCE

Frontend Developer   05/2024 - Present
MilliSoft ↗

Plantill Project:

- Developed a real-time chat application using SignalR for efficient, bidirectional communication.
- Created a responsive and intuitive user interface with modern UI libraries.
- Implemented features like message notifications, user presence indicators, and chat history management.
- Ensured high performance and scalability to handle large volumes of concurrent users and messages.

TODO Project:

- Designed and built both mobile and desktop versions of a task management application.
- Applied responsive design principles to deliver a seamless user experience across different devices.
- Integrated APIs for task synchronization, notifications, and user authentication.
- Enhanced security with data encryption and secure authentication methods.

General Responsibilities

- Collaborated with backend developers to integrate APIs and ensure efficient data flow.
- Utilized advanced frontend techniques for performance optimization, including lazy loading and code splitting.
- Implemented real-time updates and interactive components to improve user engagement.

Frontend Developer   12/2022 - 02/2023
Project Aurora Startup

- Implementing SEO strategies to enhance website visibility

and performance in search engines.

- Designing visually appealing and user-friendly interfaces for

dynamic websites.

- Developing dynamic websites with seamless navigation and

engaging user experiences.

EDUCATION

Information Technology   09/2021 - Present
Azerbaijan State Oil and Industry University - Bachelor's degree

- Web Development: Gained hands-on experience in building and managing web applications, focusing on front-end and back-end development techniques.

- Data Structures: Studied fundamental data structures such as arrays, linked lists, stacks, queues, and trees, and learned their applications in optimizing algorithms and solving complex problems.
- Database Management: Acquired knowledge in relational and non-relational databases, including database design, SQL querying, and data normalization to ensure efficient data storage and retrieval.
- Information Security: Learned key principles of cybersecurity, including encryption, authentication, and data protection techniques to safeguard applications and sensitive information.
- Object-Oriented Programming (OOP): Developed a strong understanding of OOP principles, including classes, objects, inheritance, polymorphism, and encapsulation, and applied these concepts in software design and development.
- Project Management: Gained expertise in project planning and execution, including defining project scopes, setting milestones, and tracking progress. Acquired skills in team coordination, risk management, and stakeholder communication, with knowledge of Agile and Waterfall methodologies to effectively manage and deliver projects.

NaNTech - Full Stack Web Development   04/2022 - 12/2022

- Front-End Technologies: Gained proficiency in HTML, CSS, and Bootstrap for creating responsive and visually appealing user interfaces. Acquired skills in JavaScript and jQuery for enhancing interactivity and dynamic content.
- Back-End Technologies: Learned about server-side development with an emphasis on MVC (Model-View-Controller) architecture for building scalable and maintainable web applications. Gained experience with RESTful APIs for seamless client-server communication.
- React: Developed expertise in React for building modern, component-based user interfaces with efficient state management and reusable components.

CERTIFICATES

Front End Development Libraries ↗   07/2024 - Present
freeCodeCamp

The freeCodeCamp Front-End Development Certification covered advanced React.js techniques, including component lifecycle and hooks; Redux Toolkit for state management; SASS for modular and maintainable CSS; and a broad range of front-end technologies and development workflows

JavaScript ↗   09/2023 - Present
HackerRank

It covers topics like, Functions, Currying, Hoisting, Scope, Inheritance, Events and Error Handling.

React ↗   09/2023 - Present
HackerRank

React (Basic) It covers topics like Basic Routing, Rendering Elements,State Management (Internal Component State), Handling Events, ES6 and JavaScript and Form Validation.

SKILLS

Next.js	Git
React	Figma
React Native	Material UI
Redux Toolkit	Bootstrap
SignalR	Tailwind CSS
TypeScript	CSS
JavaScript	HTML5
JQuery
